Software Developer

Highlight of Skills

Computer Programming Skills

- Backend Development: Proficient in Java (Java 8 & 11), Spring Boot, NodeJS, Express, TypeScript
- Cloud & DevOps: Experience with MS Azure, Docker, Kubernetes, Jenkins CI/CD
- Databases: MongoDB, PostgreSQL, NoSQL, Redis, MySQL
- Security & Networking: Knowledge of OAuth 2.0, JWT, SSL, VPN, Firewalls, Load Balancers

Core Competency Skills

- Agile Software Development (Scrum)
- Strong collaboration and communication in cross-functional teams
- Ability to write scalable, efficient, and testable code
- Project execution: Handling system documentation, security risk assessment, and UAT support

Educational Experience

Advanced Diploma in Computer Programming & Analysis   Jan 2024 – April 2026
George Brown College, Toronto, ON
- Developed object-oriented programming and algorithmic problem-solving skills
- Built full-stack applications using modern web technologies
- Worked with database management systems and cloud computing

Relevant Work (Professional) Experience

Backend Developer   Aug 2024 – Nov 2024
Paulos Poetry
- Developed and optimized the backend architecture using MongoDB and NodeJS
- Boosted performance by 2x through Express API optimizations
- Streamlined content delivery, improving response times by 20%

Backend Developer   Apr 2023 - Aug 2023
Rack-I
- Developed a scalable backend infrastructure using NodeJS, Express, MongoDB
- Improved data retrieval speed by 30% through optimized queries
- Led the account setup and authentication process, increasing security and reducing deployment time by 25%

Hardware & Software Analyst   Sep 2022 - Apr 2023
Toronto Metropolitan University
- Designed an internal database reducing data entry errors by 15%
- Deployed 50+ new devices, ensuring compliance with IT security standards
- Securely decommissioned 100+ outdated devices, with zero security incidents
